Education

McMaster University — Hamilton, ON
Bachelor of Applied Science in Computer Science, Minor in Statistics — *Sep. 2023 – Present*

Experience

Software Engineer Intern — Jan 2026 – Present
Clover Labs — *Toronto, ON*

- Built core carousel generation features for Echos, an AI content automation product, powering client social content that drives millions of organic views per month
- Designed an AI keyword research pipeline using the Claude API and Exa search with Ahrefs enrichment, automating keyword strategy from topic discovery to prompt generation
- Shipped 30+ production features across a TypeScript/Python monorepo (Next.js, Supabase), including a carousel editor redesign, bulk editing, and creator scraping infrastructure

Software Engineer Intern — May 2025 – Present
Rosebud AI — *San Francisco, CA (remote)*

- Developed an X bot which when tagged, creates a game and responds to the user
- Developed a full stack project where users can launch games. Implemented a weekly winner system based on upvotes. Made using Supabase, React/Vite, Typescript, TailwindCSS
- Made a software to convert any Rosebud AI game into a Whop app. Made content on X receiving over 50k impressions

Software Engineer Intern — May 2024 – Aug 2024
Birlasoft — *Toronto, ON*

- Developed a recommendation system for medical researchers and scientists using Python and ReactJS. Used mathematical concepts like cosine similarity to develop the system from scratch
- Developed a tool using Python, Google Gemini API, and Streamlit to simplify complex PPTs containing statistical data and making it easy for the users to understand

Coding Instructor — Sep 2023 – Mar 2024
Ultimate Coders — *Burlington, ON*

- Taught students of ages 6-12 the fundamentals of Python, Arduino and Scratchs
- Graded quizzes and created progress reports of over 20 student

Projects

LLM TXT | *NextJS, TypeScript, PostgreSQL, Supabase* — June 2025 – Present

- Developed a full-stack web application aimed at converting complex documentation into llm friendly
- Created my own npm package manager for creating mcp servers for any documentation

Meme Marketing | *React/Vite, JavaScript, PostgreSQL, Supabase, TailwindCSS* — Feb 2025 – Present

- Full-stack SaaS meme maker software aimed to build viral content for brands. Built out a complete Canva like meme editor with 500+ meme templates
- Other features include: Addictive short form content video generations with AI, graphical memes, fake youtube/X/Reddit posts

Resume Roast | *TypeScript, NextJS, NeonDB, PostgreSQL, Drizzle ORM* — Sep 2024 – Nov 2024

- Developed a full stack app that lets users create Resumes and cover letters with AI. The users can use it as an editor or just add bullet points and AI would make their entire ATS optimized resume
- Added a feature that lets users host their resumes online and other users can roast it
- Implemented authentication using Clerk. Made email/password or google account options. Made the frontend using TypeScript, NextJS and backend using PostgreSQL and Gemini API

Technical Skills

Languages: Java, Python, C/C++, SQL (Postgres), JavaScript, TypeScript, HTML/CSS, R
Frameworks: React/Vite, NextJS, Node.js, Flask, FastAPI, DrizzleORM
Developer Tools: Git, Docker, AWS, GCP, VS Code, Cursor, Supabase, Kubernetes
